### Overview

This document represents a summary snapshot of monitoring activities conducted by IOM and border monitoring partners at the border between Haiti and the Dominican Republic. The monitoring was put in place following the movements observed at the border before and after the 17<sup>th</sup> June 2015 expiration of the registration component of the National Plan for the Regularization of Foreigners (PNRE<sup>1</sup> in Spanish), established in the Dominican Republic. Monitoring of border movements began as of the first week of June 2015. Up until the 16<sup>th</sup> of June, figures are based on partial observations of border crossing points. The network was 100% operational as of July 2015. Its current structure is now covering 66% of border crossing points (66 points) as of February 2016.

<sup>2</sup> Individuals are registered each time they enter Haiti. The figures reflected in this report include 404 individuals who have been registered twice.

<sup>3</sup> All figures in this SitRep reflect information gathered on a voluntary basis from returnees, and therefore may not be representative of the totality of returns.

<sup>4</sup> The figures of official deportations are as of 15<sup>th</sup> August 2015.

<sup>5</sup> The figures used in the graph are based on data entry already completed and do not reflect the total figures observed (average time for completion is 2 weeks). However, there has been a significant decrease in figures related to official deportations, as returnees are more and more refusing to register with the network.
