

Border Crossing Points (BCPs) along Haiti- Dominican Republic Border - © IOM 2016

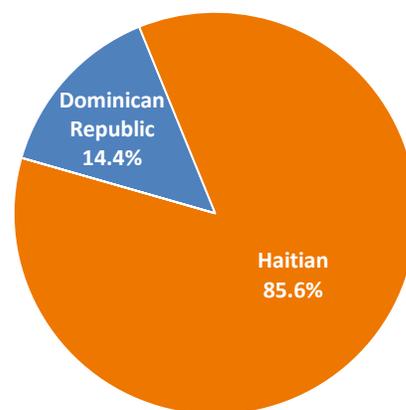

### Overview

This document represents a summary snapshot of monitoring activities conducted by IOM and border monitoring partners at the border between Haiti and the Dominican Republic. The monitoring was put in place following the movements observed at the border before and after the 17<sup>th</sup> June 2015 expiration of the registration component of the National Plan for the Regularization of Foreigners (PNRE<sup>1</sup> in Spanish), established in the Dominican Republic. Monitoring of border movements began as of the first week of June 2015. Up until the 16<sup>th</sup> of June 2015, figures are based on partial observations of border crossing points. The network was 100% operational as of July 2015. Due to budget constraints, IOM's project is now covering 40% of the border (40 border crossing points) as of 1<sup>st</sup> July 2016.

<sup>4</sup> The difference in figures between the current and previous SitRep is due the fact that the data reflects the date of entry into Haiti and not the date of the data entry into the database.

<sup>5</sup> The data entered this week appear lower than the usual trends as data entry teams are catching up on last week's absence because of their participation in other data management activities.

<sup>6</sup> The figures represented in this table correspond to the individuals who voluntarily accepted to be registered between the period from Thursday 28<sup>th</sup> July to Wednesday 3<sup>rd</sup> August 2016.
