### Overview

This document represents a summary snapshot of monitoring activities conducted by IOM and border monitoring partners at the border between Haiti and the Dominican Republic. <sup>2</sup> Individuals are registered each time they enter Haiti. The figures reflected in this report include 404 individuals who have been registered twice (as of October 2015).

<sup>5</sup> The figures used in the graph are based on data entry already completed and do not reflect the total figures observed (average time for completion is 2 weeks). However, there has been a significant decrease in figures related to official deportations, as returnees are more and more refusing to register with the network.

<sup>6</sup> The reduced figures published this week the outstanding backlog in data entry due to competing data management unit activities.

<sup>7</sup> The difference in figures between the current and previous SitRep is due the fact that the data reflects the date of entry into Haiti and not the date of the data entry into the database.

<sup>8</sup> The figures represented in this table correspond to the individuals who voluntarily accepted to be registered between the period from Thursday 7<sup>th</sup> April to Wednesday 13<sup>th</sup> April 2016.
